Style 07-022 Packing

Pure Flexible Graphite

Description

Lewco Style 07-022 Packing is braided from pure expanded graphite with high carbon content. It is resilient, self lubricating, chemically inert and thermally conductive. Lewco 07-022 can be used in both pumps and valves in a wide range of conditions. It provides superior leakage and emissions control of die-formed graphite stuffing box seal rings.

Extremely wide range of service uses such as: steam, water, fuel, gases, chemicals, mineral and synthetic oils and effluents.

Not Suitable for Highly Oxidizing Media

Application Data:

	Rotary	Reciprocating	Valve
Pressure: PSI	435	N/A	3600
Speed: FPS	75	N/A	3
pH Range	0-14		
Temp. ° F	-301 to +842 in oxidizing service -301 to +1200 in steam service
