LEWCO – SIL High Temperature Silica Fabric

Product Specifications

LEWCO Style 3600 HT-P are made of 85-90% pure continuous filament amorphous silica material, with proprietary scratch resistant coating. The intended use for these products is in all high temperature applications where the need for thermal insulation and/or protection is required. Offers excellent protection against heavy sparks, spatters, and molten slag.

Typical Properties

	<u>1800-HT-P</u>	<u>3600 HT-P</u>
Color		White
Weight (Oz./Sq. Yd.)		32-33 = 1000 gm/m ²
Thickness		.054"
Weave		12-H Satin
Silica Content		85-90%
Steady Use Temperature		1800 ° F
Melt Point		3000 ° F
Width		36"
Roll Length		50 LY

This information is given in good faith and is believed to be accurate. It is intended for use by persons skilled in the art of fabrication and applying removable/reusable insulation or like products, as well as those working with welding curtains and fire blankets. All liabilities are borne by the user of this fabric. LEWCO does not take any responsibility for misuse of this product. LEWCO recommends testing before use.
